APEx and participation

an introduction to the Archives Portal Europe as aggregation and publication platform

www.archivesportaleurope.net

5th EOGAN conference
Maritime Museum Rotterdam
19th of June 2014

APEx project co-funded by the European Commission within the framework of the ICT Policy Support Programme

overview

- **background Archives Portal Europe**
- **concept Archives Portal Europe**
- **demo front-end: what we offer end users**
- **demo back-end: what we offer data providers**
- **wrap up: what is needed for participation**

APEx project co-funded by the European Commission within the framework of the ICT Policy Support Programme

ICTPSP

background Archives Portal Europe

- **realisation via two European projects:**
  - start: **APEnet** project: January 2009 – January 2012
  - follow up: **APEx** project: March 2012 – March 2015
  - *continuation from March 2015 onwards: **APEF** (Foundation)*
- **founding, financing, goals:**
  - initiative: European national archivists (EBNA/EAG)
  - financing: European Commission (EC) → eContent*plus* and ICT-PSP programmes, centered around Europeana
  - two goals: creating one online access point for all European archival material and acting as Europeana domain aggregator

APEx project co-funded by the European Commission within the framework of the ICT Policy Support Programme
ICTPSP

concept: standardise use of standards

Archives Portal Europe:

- collects and stores only metadata and links to digital objects

- uses internationally accepted archival metadata standards:
  - ISAD(G) / EAD → **apeEAD**
  - ISDIAH / EAG → **EAG2012**
  - ISAAR / EAC-CPF (in progress → **apeEAC-CPF**)
  - METS (in progress → **apeMETS**)

- enables conversion of APE metadata to Europeana metadata, in case digital objects are linked: ***apeEAD → EDM***

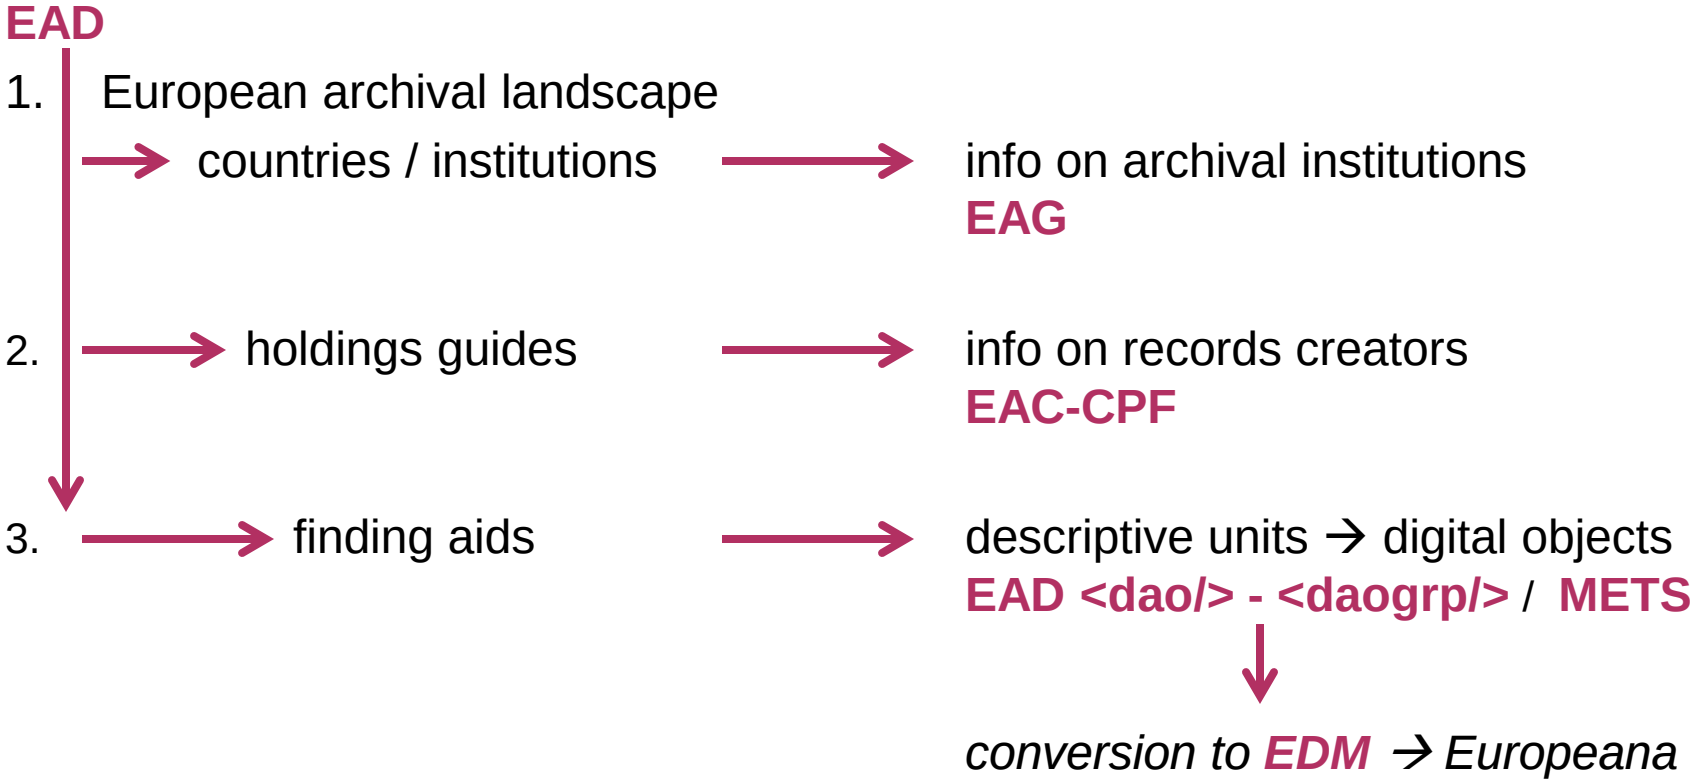
http://www.apex-project.eu/index.php/outcomes/standards

APEx project co-funded by the European Commission within the framework of the ICT Policy Support Programme

ICTPSP

concept: connecting standards

standardised information connects in a 3 layer model:



APEx project co-funded by the European Commission within the framework of the ICT Policy Support Programme

concept: data providers in control

Archives Portal Europe provides:

- the Archival Landscape, including countries/institutions
- mapping stylesheets to map local standards to the APE standards
- a back-end (Dashboard) account for individual archival institutions to enable their data managers to:
  - upload/manage EAG info / EAD holdings guides / finding aids
  - convert/forward info on digital archival objects to Europeana
- help → ***Country Manager*** → manuals / workshops / assistence

→ ***institutions will always stay in control over their own metadata***

APEx project co-funded by the European Commission within the framework of the ICT Policy Support Programme
ICTPSP

front-end: what we offer end users

Archives Portal Europe offers two ways of searching:

- simple/advanced ***Google-like search*****:**
  users can enter search terms on the homepage and get a flat hit list
- hierarchically structured or ***Advanced search*****:**
  users can browse through the archival material via the 3-layer model

search results are always displayed in a ***List view*** or ***Context view***, and it is easy to switch between those views

it is always possible to see search results in the context of a finding aid

information on archival institutions is available in the ***Directory***

APEx project co-funded by the European Commission within the framework of the ICT Policy Support Programme

The Netherlands: Treaty between the King of Sweden and the Republic of the Netherlands, 1614
The 1614 treaty between The Netherlands and Sweden was an immediate result of the Kalmar wars of 1611-1613, which resulted in a ban on all Dutch traffic to Sweden. In order to secure free entrance to the Baltic, the Dutch entered anti-Danish alliances with the Hanseatic league in 1613 and with Sweden in 1614.

Note:
as you can see the subdivision of the Archival Landscape within countries is a bit divers: sometimes regional, sometimes thematical, etc.
we are currently looking at ways to make this more consistent and to also be able to incorporate archival communities that operate cross country

back-end: what we offer data providers

an Institution Manager account has these possibilities:

- enter information on the archival institution → via upload of an EAG/XML file or via filling in a web form
- upload/harvest EAD/XML files (finding aids) of the archival institution → via **HTTP**, **FTP** or **OAI-PMH**
- convert/validate EAD/XML files against apeEAD and index/publish them in the portal → *this can be done automatically via OAI-PMH*

optional:

- create a holdings guide
- convert information on digital objects to **EDM** → *Europeana*

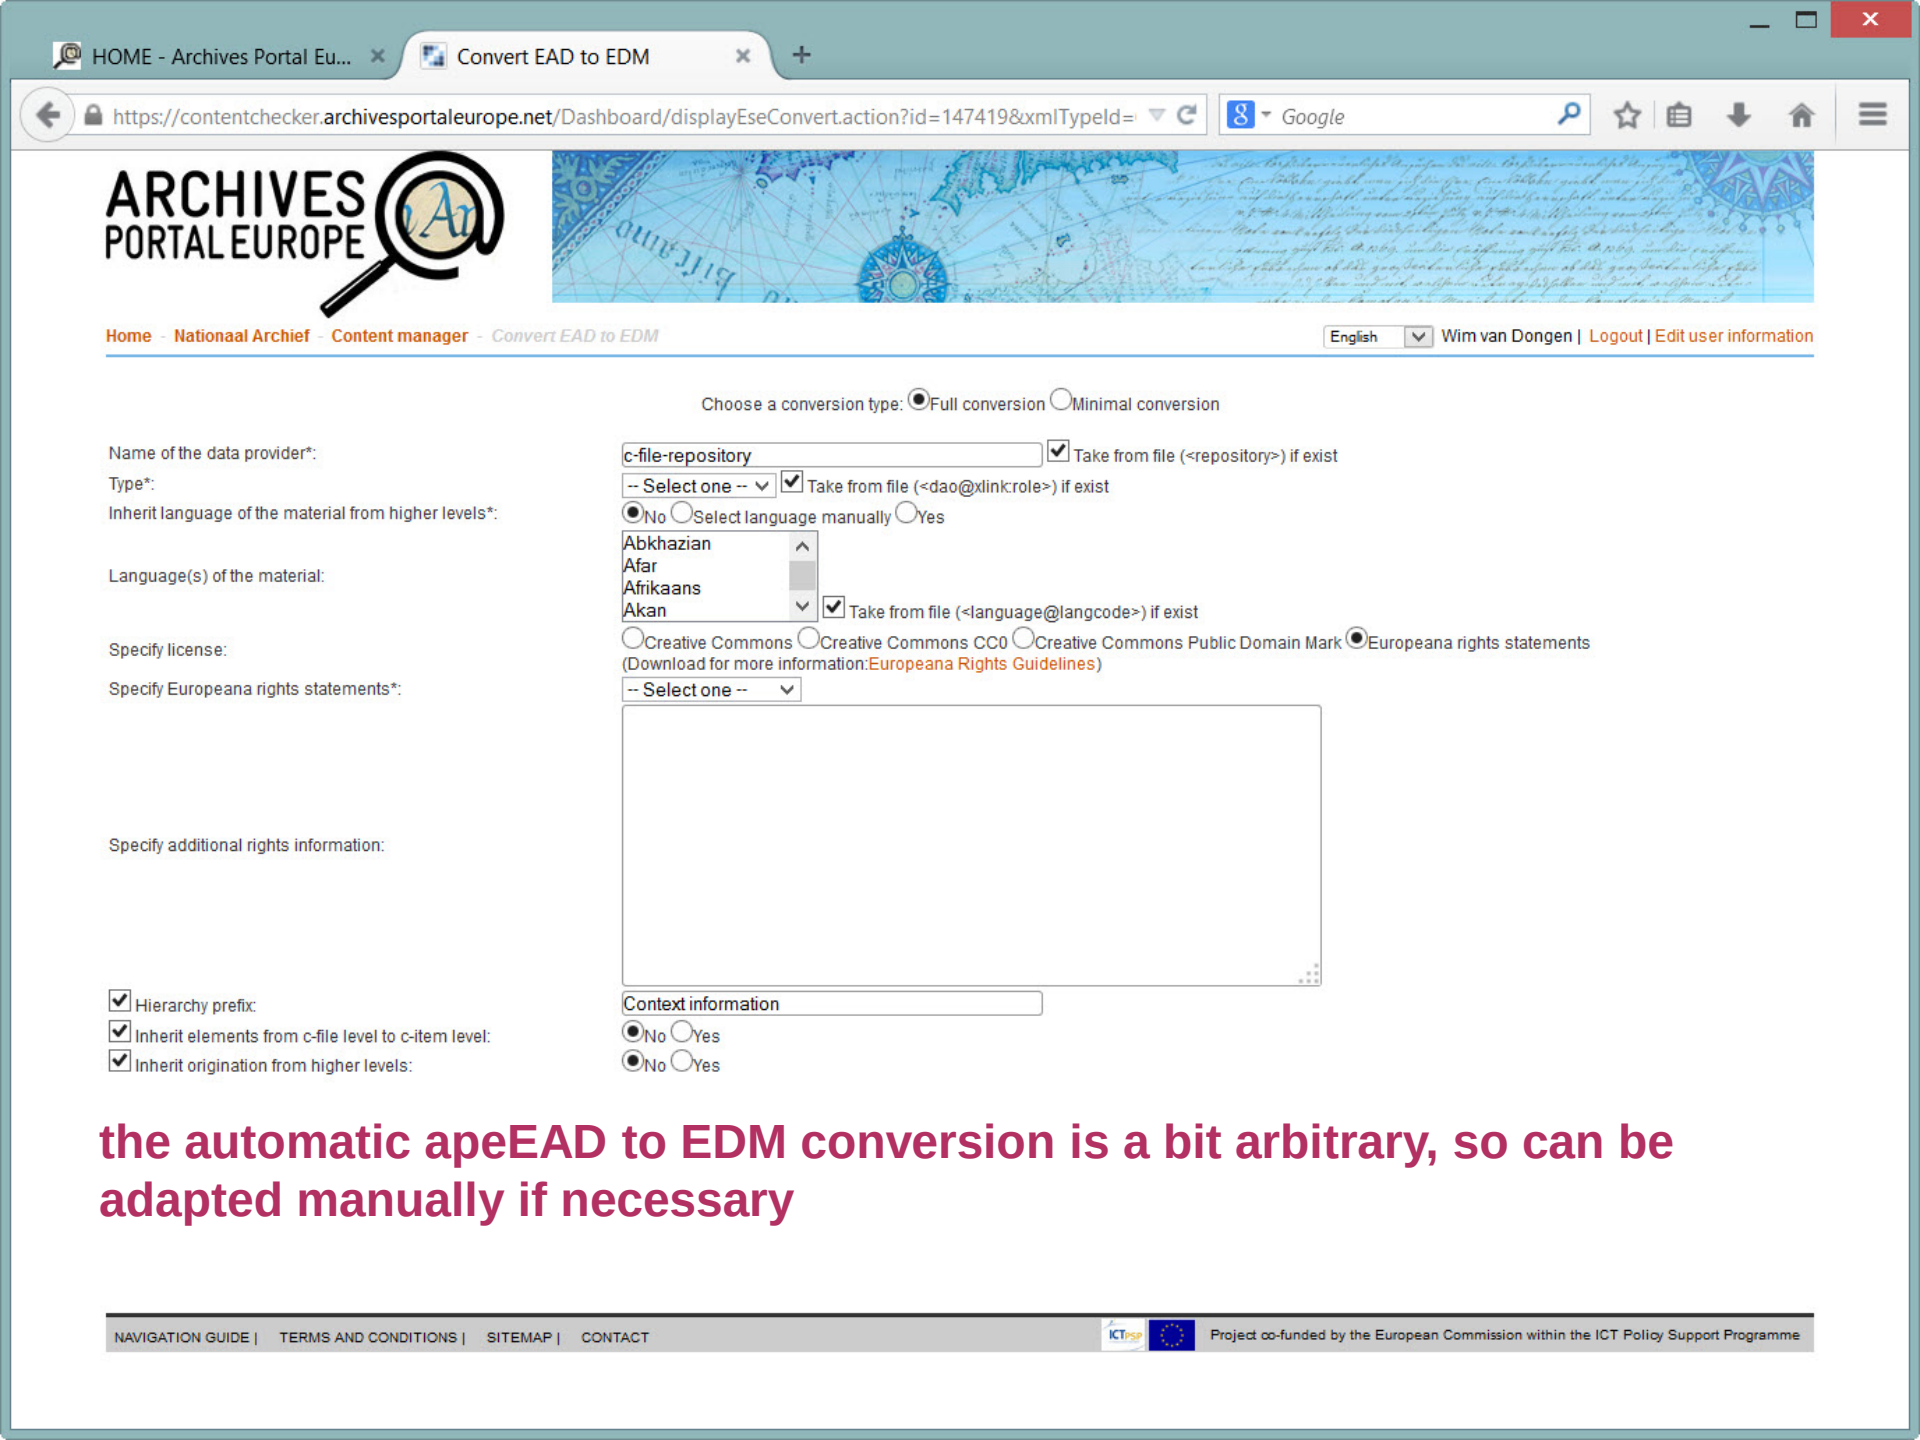
among the actions that either can be performed in batch or per individual finding aid is the conversion to EDM
NAVIGATION GUIDE | TERMS AND CONDITIONS | SITEMAP | CONTACT
Project co-funded by the European Commission within the ICT Policy Support Programme
javascript:changeOrder('eadid','true')



the automatic apeEAD to EDM conversion is a bit arbitrary, so can be adapted manually if necessary

Needed: finding aids in EAD/XML
